Speaking at a non-partisan luncheon in Detroit he said that a Republican had told him during the day that he derived pleasure from association with Democrats. The president declared he had long enjoyed the friendship and companionship of Republicans, and because of being a teacher, "would like to teach them something."

VILLA PURSUED INTO DURANGO MOUNTAINS

MEXICAN PAPER SAYS BANDIT CHIEF APPEAR- ED IN JIMINEZ AFTER ITS CAPTURE.

EL PASO, July 10.—General Matias Damos, nephew of General Ignacio Ramos, who was killed in the recent Corralitos fight, is pursuing the Villista band under Calisto Contreras into the mountains of Durango, according to a telegram received today by General Gonzalez as Juarez.

The message from General Trevino at Chihuahua City says the Villistas did not give battle at Las Nieves, as expected, but continued to the Rio Florida. Ramos has a force of 1,500 men.

Francisco Villa appeared in Jiminez after its capture by bandits, according to La Democrata, a Carranza organ published in Chihuahua City, a copy of which has been brought to El Paso by travelers.

This paper states that, after annihilating the de facto force under General Ramos at Corralitos, the Villistas entered Jiminez, sacked the place thoroughly, put to death the Carranza officials and gave the captured Carranza soldiers their choice of joining their party or of having their right ears cropped.

Calisto Contreras was then in command, the paper says, but later Villa entered the town in a carriage. He is pictured as having walked on crutches and as having seemed badly crippled in the legs.

In this account the Villista force was estimated at 2,000 men.

GERMAN DIVER ELUDES ENEMIES; REACHES U. S. WITH \$1,000,000 CARGO

Dyestuffs Arrive At Baltimore Aboard Undersea Craft Which Broke The Allies' Blockade; Captain Of Sub- marine Says Others Will Cross.

By Associated Press.

BALTIMORE, July 10.—Captain Paul Koenig of the Deutschland, entered his vessel with customs officials as a commerce carrier and delivered letters to the German embassy. The captain is ready to discharge a million dollar cargo of dyestuffs and take on a load of metal and rubber for the return trip.

Whether he will have his cargo ready by time of departure depends on the vigilance of awaiting enemies. Koenig announced that the Deutschland was the first of a fleet being built by the Germans. He expects the completion of the Bremen in about eight weeks.

After a thorough examination by Federal inspectors, it was agreed that no armament was aboard the Deutschland. The captain and crew then posed for photographs. The captain issued a statement asserting that the trip breaks the British control of the seas. He says he is certain of eluding enemy vessels.

During the entire voyage the Deutschland traveled on the surface. It was submerged but ten hours in the British channel to escape destroyers. The boat left Bremen, June 14th. From there it went to Helgoland, remaining there nine days. It began its ocean trip June 23rd.

A representative of the German embassy here presented the personal compliments of the ambassador to the captain and crew. Koenig was the honor guest at a luncheon. He then resumed his account of the voyage. He said that for several weeks the

boat was used in preliminary practice.

In the North sea the boat was submerged five times to avoid enemy patrols and in the Atlantic it was submerged four times during practice runs. Ninety-five tons of fuel oil and ten tons of water are still remaining in the tanks. The cruising radius of the submarine is 13,000 miles. The crew employed their time with a phonograph which had 100 records. In answer to a question, Captain Koenig said: "No, we didn't have 'Tipperary.'" The crew read and smoked when the boat was not submerged.

The new taxes are expected to yield \$197,000,000 annually.

DETROIT, July 10.—What the United States must do to take the share of the world's trade at the end of the European war was outlined to the World's Salesmanship congress here today by Secretary Redfield of the commerce department.

"The future," he said, "will not be the result of legislation, but of action. The American trade missionaries who will be sent forth must go with every resource of science and management at their command."

"We shall see, no doubt, when the war shall end, and in a measure depending on when that end shall come, an apparent reaction in our foreign trade. The mere recession of prices, normal to the coming of peace, will affect the volume in dollars of that trade; yet, with confidence, we may look for a second reaction upwards in that foreign trade when American industries, conscious of their power because it rests on searching study, shall send their men abroad in the inspiring contest of brains and character which will wage between nations."
